

# Power Plant Sale/Relocation

RWE offers a complete relocation package, from the creation of an asset relocation plan to the management, packaging and transportation of plant components through the supply chain. In case asset recovery is needed, we can initiate repairs, refurbishment and ensure overall system compatibility.

RWE can provide support services for dismantling, demolition of the plant, removal, planning and organising the transport of the components as well as reconstruction engineering for the new site – civil, mechanical, electrical, controls etc.

## Your benefits

- Avoid miscommunications by appointing one single relocation manager
- Reliable relocation professionals
- Efficient and safe dismantling
- Optimal reassembly of your equipment at new location
- Decide on investment with confidence

## Our Scope

---

### Areas of Expertise

- Dismantle plants and equipment
- Design, build or modify structures
- Mechanical and electrical system improvements
- Reconfigure existing plants
- Retrofit, upgrade and reconfigure plants
- Relocate, reassembly and install equipment and systems

### Deconstruction

- Pre-feasibility study
- Bankable feasibility study
- Technical due diligence
- Procurement support (e.g., RFQs for EPC, O&M)
- Deconstruction strategy for selected power plants
