

Senior Mechanical Engineer **Mechthild Engelbert**

Mechthild is an expert in the technical, economic and environmental assessment of material handling with over 25 years of professional experience in the power generation business. Her profound experience covers the development and review of material handling related capital investment processes (from project concepts to bankable feasibility and project implementation studies). She is familiar in the management of international consulting projects.

Mechthild has a Diploma (MSc) in Mechanical Engineering from the University of Applied Sciences and Arts, Dortmund, Germany.

1 What gives you most satisfaction in your work?

Diverse teams in terms of nationality, professional background and gender let every project become a pleasant and fascinating business for me.

2 Why did you choose RWE TI?

My family works for RWE since generations, so I am born into this technical environment. RWE TI represents a trustworthy and extremely well-experienced partner in the service business for international projects, so I decided to be a part of this team.

3 “Your challenge is our passion” What it means to me:

Every project brings its challenges. This certainly is what defines our job and fulfills it with a lot of ambition and high demands which is exactly what we love to do.
