Representative and Qualified person to inspect pressure tanks and pipelines.

He has country experience in America, Asia and Europe.

Kai-Peter completed his studies in Product Development (Development Management, M.Eng.) at FH Aachen, Germany.

1 What gives you most satisfaction in your work?

My position at RWE Technology International enables me to work together with different departments and I am constantly learning something new.

2 Why did you choose RWE TI?

I have the opportunity to help shape the future of energy supply and to contribute my accumulated experience from other branches of industry in a targeted manner.

3 What three words best describes you?

Logically. Analytically. Critically.

4 "You get your best solution" – What it means to me:

To take the customer's requirements into account and "to build on" and trust the existing knowledge within RWE Technology International.
