## Project description

South-west of the Netherlands innogy Offshore Wind Netherland B.V. developed the Offshore Wind Farm Borssele with a power output of 1,400MW.

RWE was assigned to support the development and tendering. Our development experts were embedded in the client's project team and acted as engineering, safety, quality and interface manager to the offshore Wind farm tenders. We added value to the project through our involvement in several expert roles such as Health & Safety, Document Management, Civil Engineering and Interface Management.

Europe & Central Asia
